PROFESSIONAL SUMMARY

AI/ML-focused Python developer with hands-on experience in Generative AI, Agentic AI and Retrieval-Augmented Generation (RAG) — LLM applications, AI agents, tool/function calling, agent workflows, LangChain, LangGraph, embeddings, vector search and prompt engineering. Backend experience building production applications with Python, Django, Django REST Framework, PostgreSQL, MySQL and Redis, including real-time communication and AI-integrated employee applications. Strong AI/ML foundation (Scikit-learn, TensorFlow, Keras) from a specialized B.Tech, plus an active self-study track covering transformer architecture, evaluation frameworks and multi-agent systems.

EDUCATION

Institute of Aeronautical Engineering — B.Tech, Computer Science & Engineering (AI & ML) 2021 – 2025

CGPA: 7.21/10

The Secunderabad Public School — CBSE, 10th Class 2019

PROFESSIONAL EXPERIENCE

Pranathi Software Services Pvt. Ltd. — Junior Python Developer Jan 2026 – Present

Hyderabad, India

Work on an AI-integrated employee platform (Digital Employee) featuring AI calling agents, avatar-based chatbots and AI-driven workflows built with GenAI and AI-agent components.

Develop and maintain backend applications using Python, Django and Django REST Framework based on business requirements.

Design and implement RESTful APIs for business workflows, user management, communication and application modules.

Work with PostgreSQL and MySQL and debug API, database and server-side issues to improve reliability.

Develop real-time communication using WebSockets, Socket.IO and ASGI, including messaging and unread-message workflows.

Integrate Firebase Cloud Messaging (FCM) for push notifications and device-token management.

Use Postman for API testing and Git for version control; participate in debugging, code reviews and application maintenance.

Pranathi Software Services Pvt. Ltd. — Python Developer Intern Oct 2025 – Jan 2026

Hyderabad, India

Developed backend functionality using Python, Django and Django REST Framework and assisted with REST API implementation.

Performed API testing, database operations and application debugging while following software development practices.

TECHNICAL SKILLS

Generative AI: GenAI, LLMs, Prompt Engineering, Embeddings, Structured Outputs, AI Workflows

Agentic AI: AI Agents, Agentic Workflows, Tool/Function Calling, Planning, Memory, Multi-Agent Systems, Autonomous Agents

AI Frameworks: LangChain, LangGraph

RAG: Retrieval-Augmented Generation (RAG), Document Ingestion, Chunking, Embeddings, Semantic Search, Vector Search

AI/ML: Scikit-learn, TensorFlow, Keras, OpenCV, Pandas, NumPy

Programming Languages: Python, SQL, JavaScript

Backend: Django, Django REST Framework, REST APIs

Frontend: React, HTML, CSS

Databases: PostgreSQL, MySQL

Real-Time: WebSockets, Socket.IO, Redis

Testing/Tools: Postman, Git, GitHub, VS Code, PuTTY, WinSCP

Practices: SDLC, Agile, API Testing, Debugging, Code Review, Application Support

PROJECTS

Digital Employee Platform — AI-Integrated Application

Python | Django | Django REST Framework | PostgreSQL | React | WebSockets | GenAI | AI Agents | AI Workflows

Worked on an AI-integrated employee platform featuring AI calling agents, avatar-based chatbots and AI-driven workflows.

Developed REST APIs and backend business logic for employee workflows, communication and workflow automation.

Supported integration between backend, React frontend, real-time communication and AI-powered modules.

HRMS Chat Application

Python | Django | Django REST Framework | PostgreSQL | WebSockets | Socket.IO | Firebase

Developed backend functionality for real-time employee communication, including one-to-one and group messaging.

Implemented message delivery, unread-message tracking, active/inactive status and chat-group workflows using Django and WebSockets.

Integrated Firebase Cloud Messaging for push notifications and implemented secure user authentication.

Social Media Marketing Application

Python | Django | Django REST Framework | PostgreSQL | React

Developed APIs supporting campaign management, scheduling and user workflows; implemented business logic and database operations.

CERTIFICATIONS

PCAP — Python Programming | CLA — C Programming | Full Stack Development — Udemy | Artificial Intelligence — Simplilearn | HackerRank — Python & SQL
